

FF39012

.243/.308/7.62x51 In-Chamber Red Laser Brass Boresight

Laser wavelength (nm)	632-650
Output power (mW)	<5
Battery type	2x AG5 or 3x AG3
Battery life (hours)	1
Range for sighting (yds)	15-100
Dot size (in@100yds)	2
Operation	on/off end cap
Construction	brass
Operating temp (°F)	15-120

FEATURES

- Precision accuracy
- Reliable and durable
- Brass construction
- Compact & lightweight
- Easy to pack and travel

ACCESORIES

- Batteries

Accuracy has never before been so easily attained than with the Firefield series of in-chamber red laser brass boresights. The Firefield brass boresights deliver precision accuracy without wasting time and ammo at the range. Once placed in the chamber of a firearm, the red laser dot appears exactly where the barrel is pointed, allowing the weapon sights to be adjusted to the theoretical impact point. Durable brass construction means you'll be able to reliably use this boresight for years. Easy to pack and travel with, the Firefield brass boresights feature a compact, lightweight design that allows you to carry it wherever you go, from the range to the field.
